

Do It Yourself Survey™

Empowering policyholders and expediting property inspections

Informed Underwriting Decisions

Optimize Time and Investment

DIY Survey™ integrations within the CoreLogic® UnderwritingCenter™ gather comprehensive interior and exterior views of properties by prompting policyholders through detailed yet simple Do-It-Yourself Inspections. The AI-guided mobile system enables policyholders to use their mobile devices to take various actions, including taking photos and videos and capturing data, resulting in detailed data collection at a reduced cost.

With this full set of data and intelligence, DIY Surveys can help underwriters make the best policy decisions for every property without onsite visits.

Features

- **AI-guided Workflows.** Provides intuitive prompts for users to take action, providing a simple, user-friendly experience for policyholders.
- **Automated Hazard & Risk Identification.** Detects risk, hazards, and property characteristics from policyholder-provided photos to increase underwriter awareness.
- **Holistic Views.** Assembles comprehensive and up-to-date interior and exterior views using property photos and videos.
- **UnderwritingCenter Integration.** Photos, videos, and data from the DIY Survey are integrated into UnderwritingCenter to help identify policy eligibility issues and inform underwriter decision-making.

Benefits

DIY Survey enables underwriting teams to:

- **Rapid Assessment:** On average, completed 4x faster than traditional physical inspections.
- **Reduce Costs:** Less on-site property inspections equate to reduced transactional costs.
- **Standardize Inspections:** Gain more consistent AI-driven data.
- **Aid in Loss Ratio Improvement:** Identify critical hazards upfront, driving more accurate valuations.
